

Portfolio Presentation

By Mark Conanan

Design Process

- The website aesthetic is aimed to be simple and dynamic
- Portfolio is designed to be on one page, with the initial screen having an animation to get the attention of viewers.
- Different fonts were used to emphasize text content (Montserrat, Lato and Libre Baskille)
- A sticky header and footer/nav bar is used with the body margins to provide a frame on the page.
- All pictures are sourced from unsplash.com.

Mood Board

Live Demo

Build Process and Challenges

- Code everything in one go and modify
 - Became a challenge in itself as modifying breaks a lot in the code
 - Lesson - code and debug each part before continuing with the next
- Positioning the texts in the Divs
- Parallax Backgrounds
- Flexbox and Grid

Ethics and Favorite Parts

- All pictures are sourced from unsplash.com (no copyright infringement)
- Design and execution
- Working code
